

INSTALLATION INSTRUCTIONS

1

CHOCK WHEELS, RAISE EMPTY BED

Set Dump-Lok on truck frame, pushing firmly so the top and bottom plates make full contact

2

PLACE SAFETY CHAIN AROUND FRAME

Place chain around frame or cross member. Slide chain through key slot hole and tighten/lock chain.

3

REPEAT STEPS

Repeat steps 1-2 for opposite side of truck.

4

LOWER DUMP BED

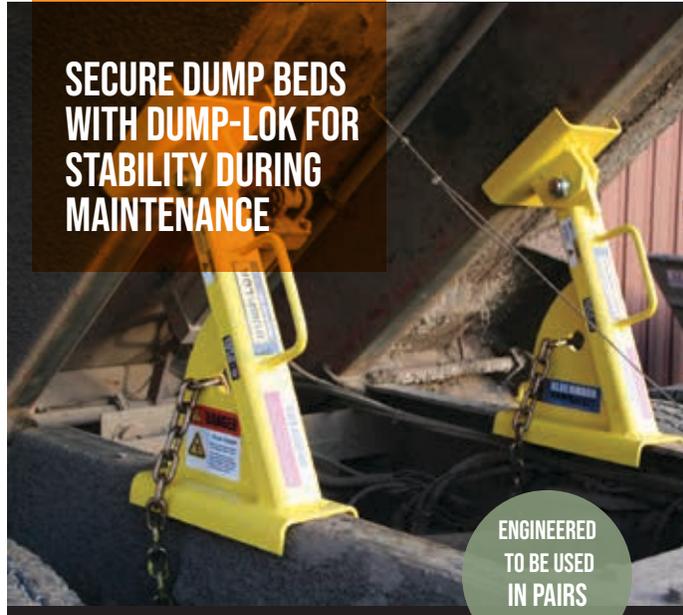

Slowly and carefully lower the dump bed to secure the Dump-Loks.

DO NOT "POWER DOWN" THE DUMP BOX! THIS CAN DAMAGE THE DUMP-LOK.

SECURE DUMP BEDS WITH DUMP-LOK FOR STABILITY DURING MAINTENANCE

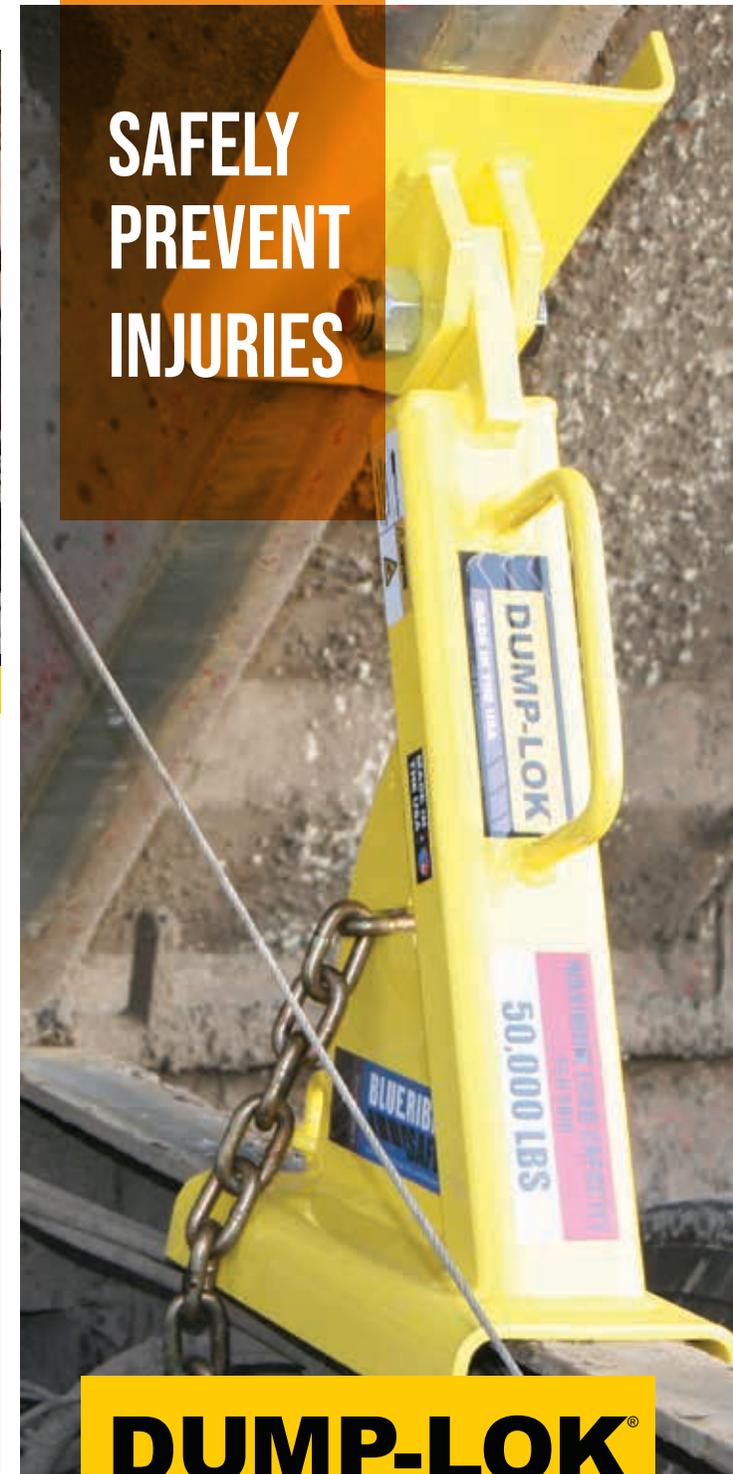

ENGINEERED TO BE USED IN PAIRS

 **MADE IN THE USA**

MODELS

Trucks and trailers are not all made alike and neither are our Dump-Loks. We have models to accommodate different truck frame widths and dump box frames.

The UDL-105 is the most popular model, followed by the UDL-106. These models work with most dump trucks and dump trailers.

The UDL-109FT model is used in the mining industry and is extra heavy-duty for large mining trucks. It has a forklift pocket for ease of lifting onto the truck frame.

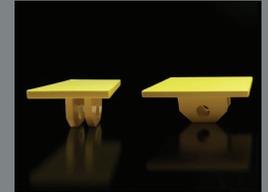

TOPS

There are two top options for models UDL-105, UDL-106, UDL-107 and UDL-108. Tops are interchangeable and can be purchased separately.

■ WIDE TOP

Used for frame to frame applications

■ FLAT TOP

Used for offset box frames or extra wide frames
